Get Onboard with PayGate™ Payments HUB

Local payment support: In addition to the cross-border payment support, Payments Hub also enables simpler local payment activities.

Data enrichment and visualization: Centralized approach in data management and analytics feeds the customer data automatically into the relevant systems.

Reporting simplified: With a unified and integrated approach, it is possible to report different balances and transactions within the day or at the end of the day easily.

Payment screening and fraud detection: Payments Hub enables different platforms to communicate with each other which improves interoperability and provides an inter-bank transaction screening. It supports activities to detect and prevent fraud.

Payments settlement: As the payment initiation, tracking and receiving / responding to the payments are done via a unified system, the payment settlement can be obtained with complete transparency and quickly.

ISO 20022: Payments Hub is completely ISO 20022 for more structured payments messaging.

Seamless MT-MX Conversion

PayGate™ Converter helps build resilience for ISO 20022 compliance with user friendly UX design and corresponding map layouts, assuring immediate translation for your financial messaging needs. It will function as a translation application in the ISO 20022 migration process that will be able to convert messages in MT (txt) format to MX (xml) format, and in contrast MX (xml) format to MT (txt) format depending on the request.

Converter is accessible as a stand-alone and a web integration module which makes the technology simpler to implement in the existing systems.

Converter offers pre-defined translation rules so that the conversion process can be easier and smoother for the customers who are not fully accustomed to the conversion system.

PayGate™ Converter Offers

**User friendly
MT-MX conversion**

**Mapping Rule and
Schema validation**

**Message enrichment prevents
loss of data in the conversion process**

**Network or interface
independent integration**
