

ABOUT US

Fineksus was founded in Istanbul, Turkey in 2002 as a software and professional service provider to deliver technical consultancy, outsourcing services, standalone / SaaS AML, and payment software solutions for banks, brokers, and corporations. At the beginning of 2013, Fineksus started managing its ongoing GCC Region operations at its new office in Dubai, UAE.

Through the company's key offerings – SWIFT Service Bureau and PayGate – Fineksus provides cost efficiency and rich functionality for financial messaging operations and compliance requirements. Fineksus leverages its solutions through its experienced, certified consultants, as well as with a strong commitment to its partners and customer-oriented service approach.

RITMUS Partnership

Ritmus, is a technology and consultancy company, positioned as "Trusted Advisor", that uses digital technologies to improve and create new business processes, culture, and customer experiences to meet changing business and market needs of companies.

Ritmus is the business partner of Fineksus, a global leader in AML compliance and financial messaging in the finance industry, and the Authorized Cloud Reseller of Salesforce, the world's #1 Customer Success Platform.

SWIFT Service Bureau Services by Fineksus

SWIFT Service Bureau is an alternative SWIFT infrastructure service offering banks, intermediary institutions, corporates, and all the other financial institutions SWIFT connectivity services, applications hosting services, and maintenance and operation services of these applications with shared and therefore low-cost value-added solutions.

All the services provided by Fineksus Service Bureau are designed to comply with SWIFT standards and regulations, and all the technical operations are carried out by experienced SWIFT certified experts.

GWCP (GateWay Connectivity Pack)

It provides a secure and reliable SWIFT connectivity service for the production infrastructures.

Additionally, Fineksus provides connectivity packs for disaster recovery sites of the banks upon request.

SAAS (Shared Alliance Application Service):

It enables the use of SWIFT by taking advantage of the Shared Alliance system.

Shared Alliance Application Service

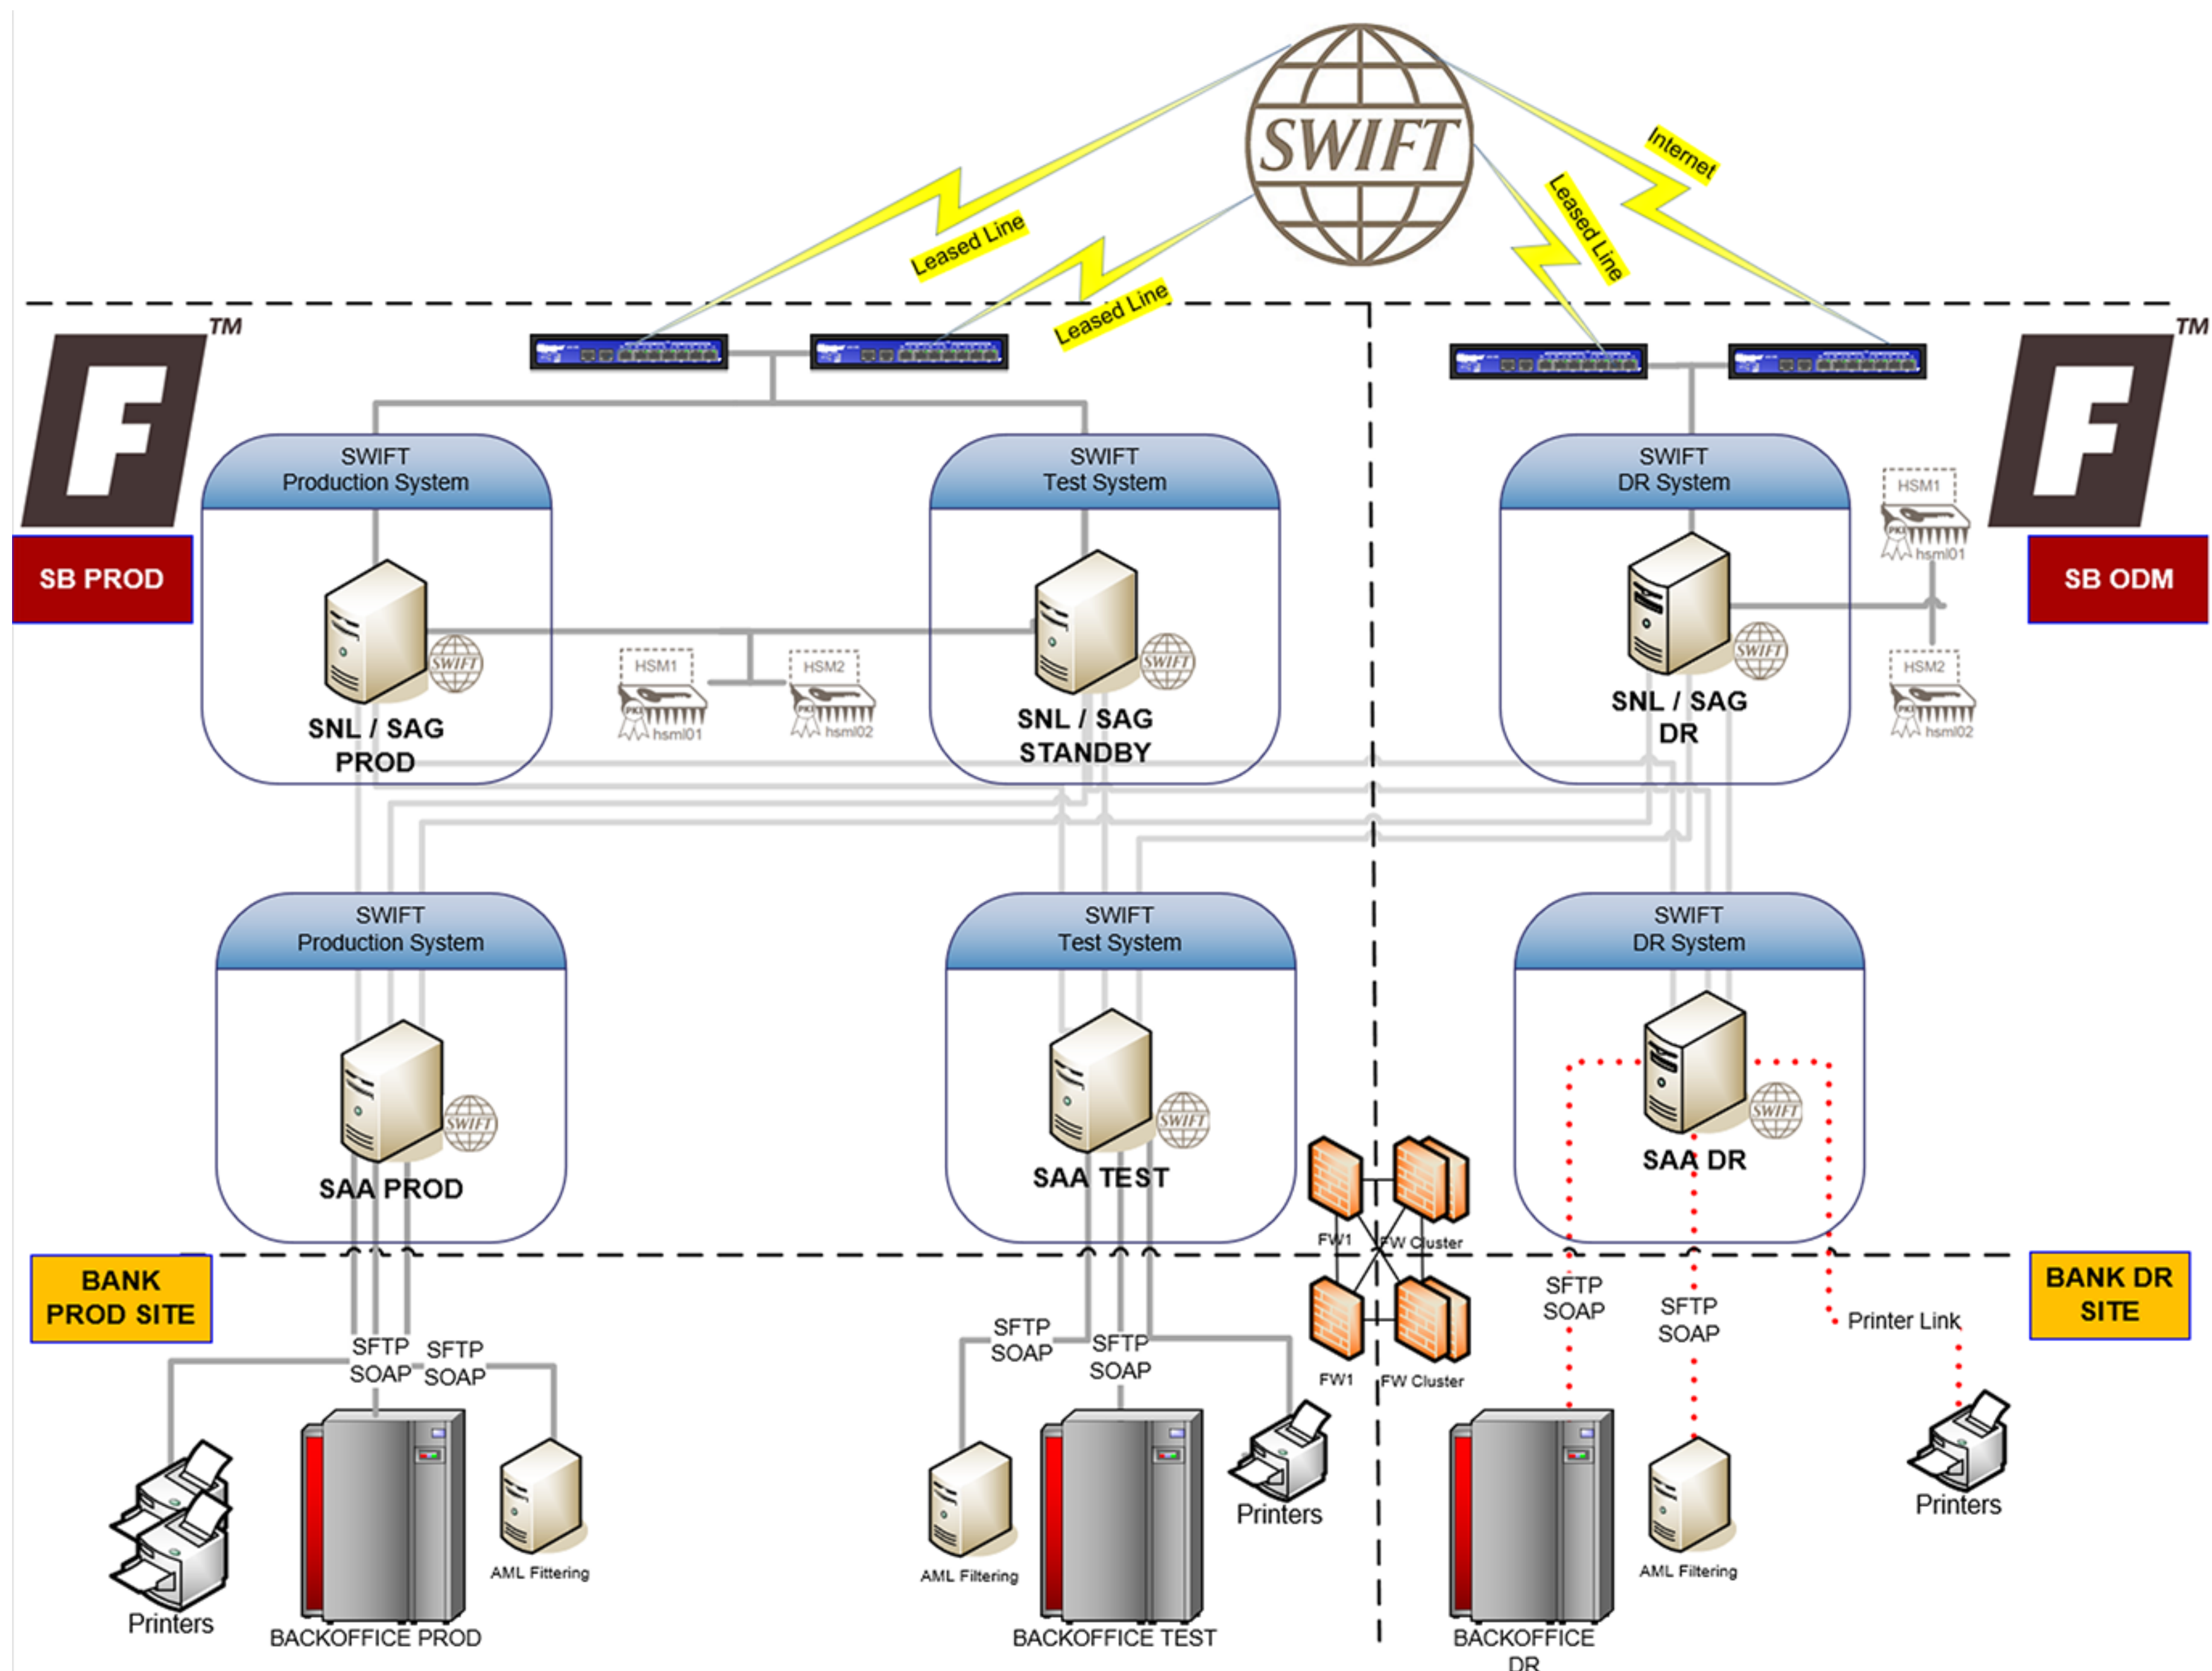

SAAS

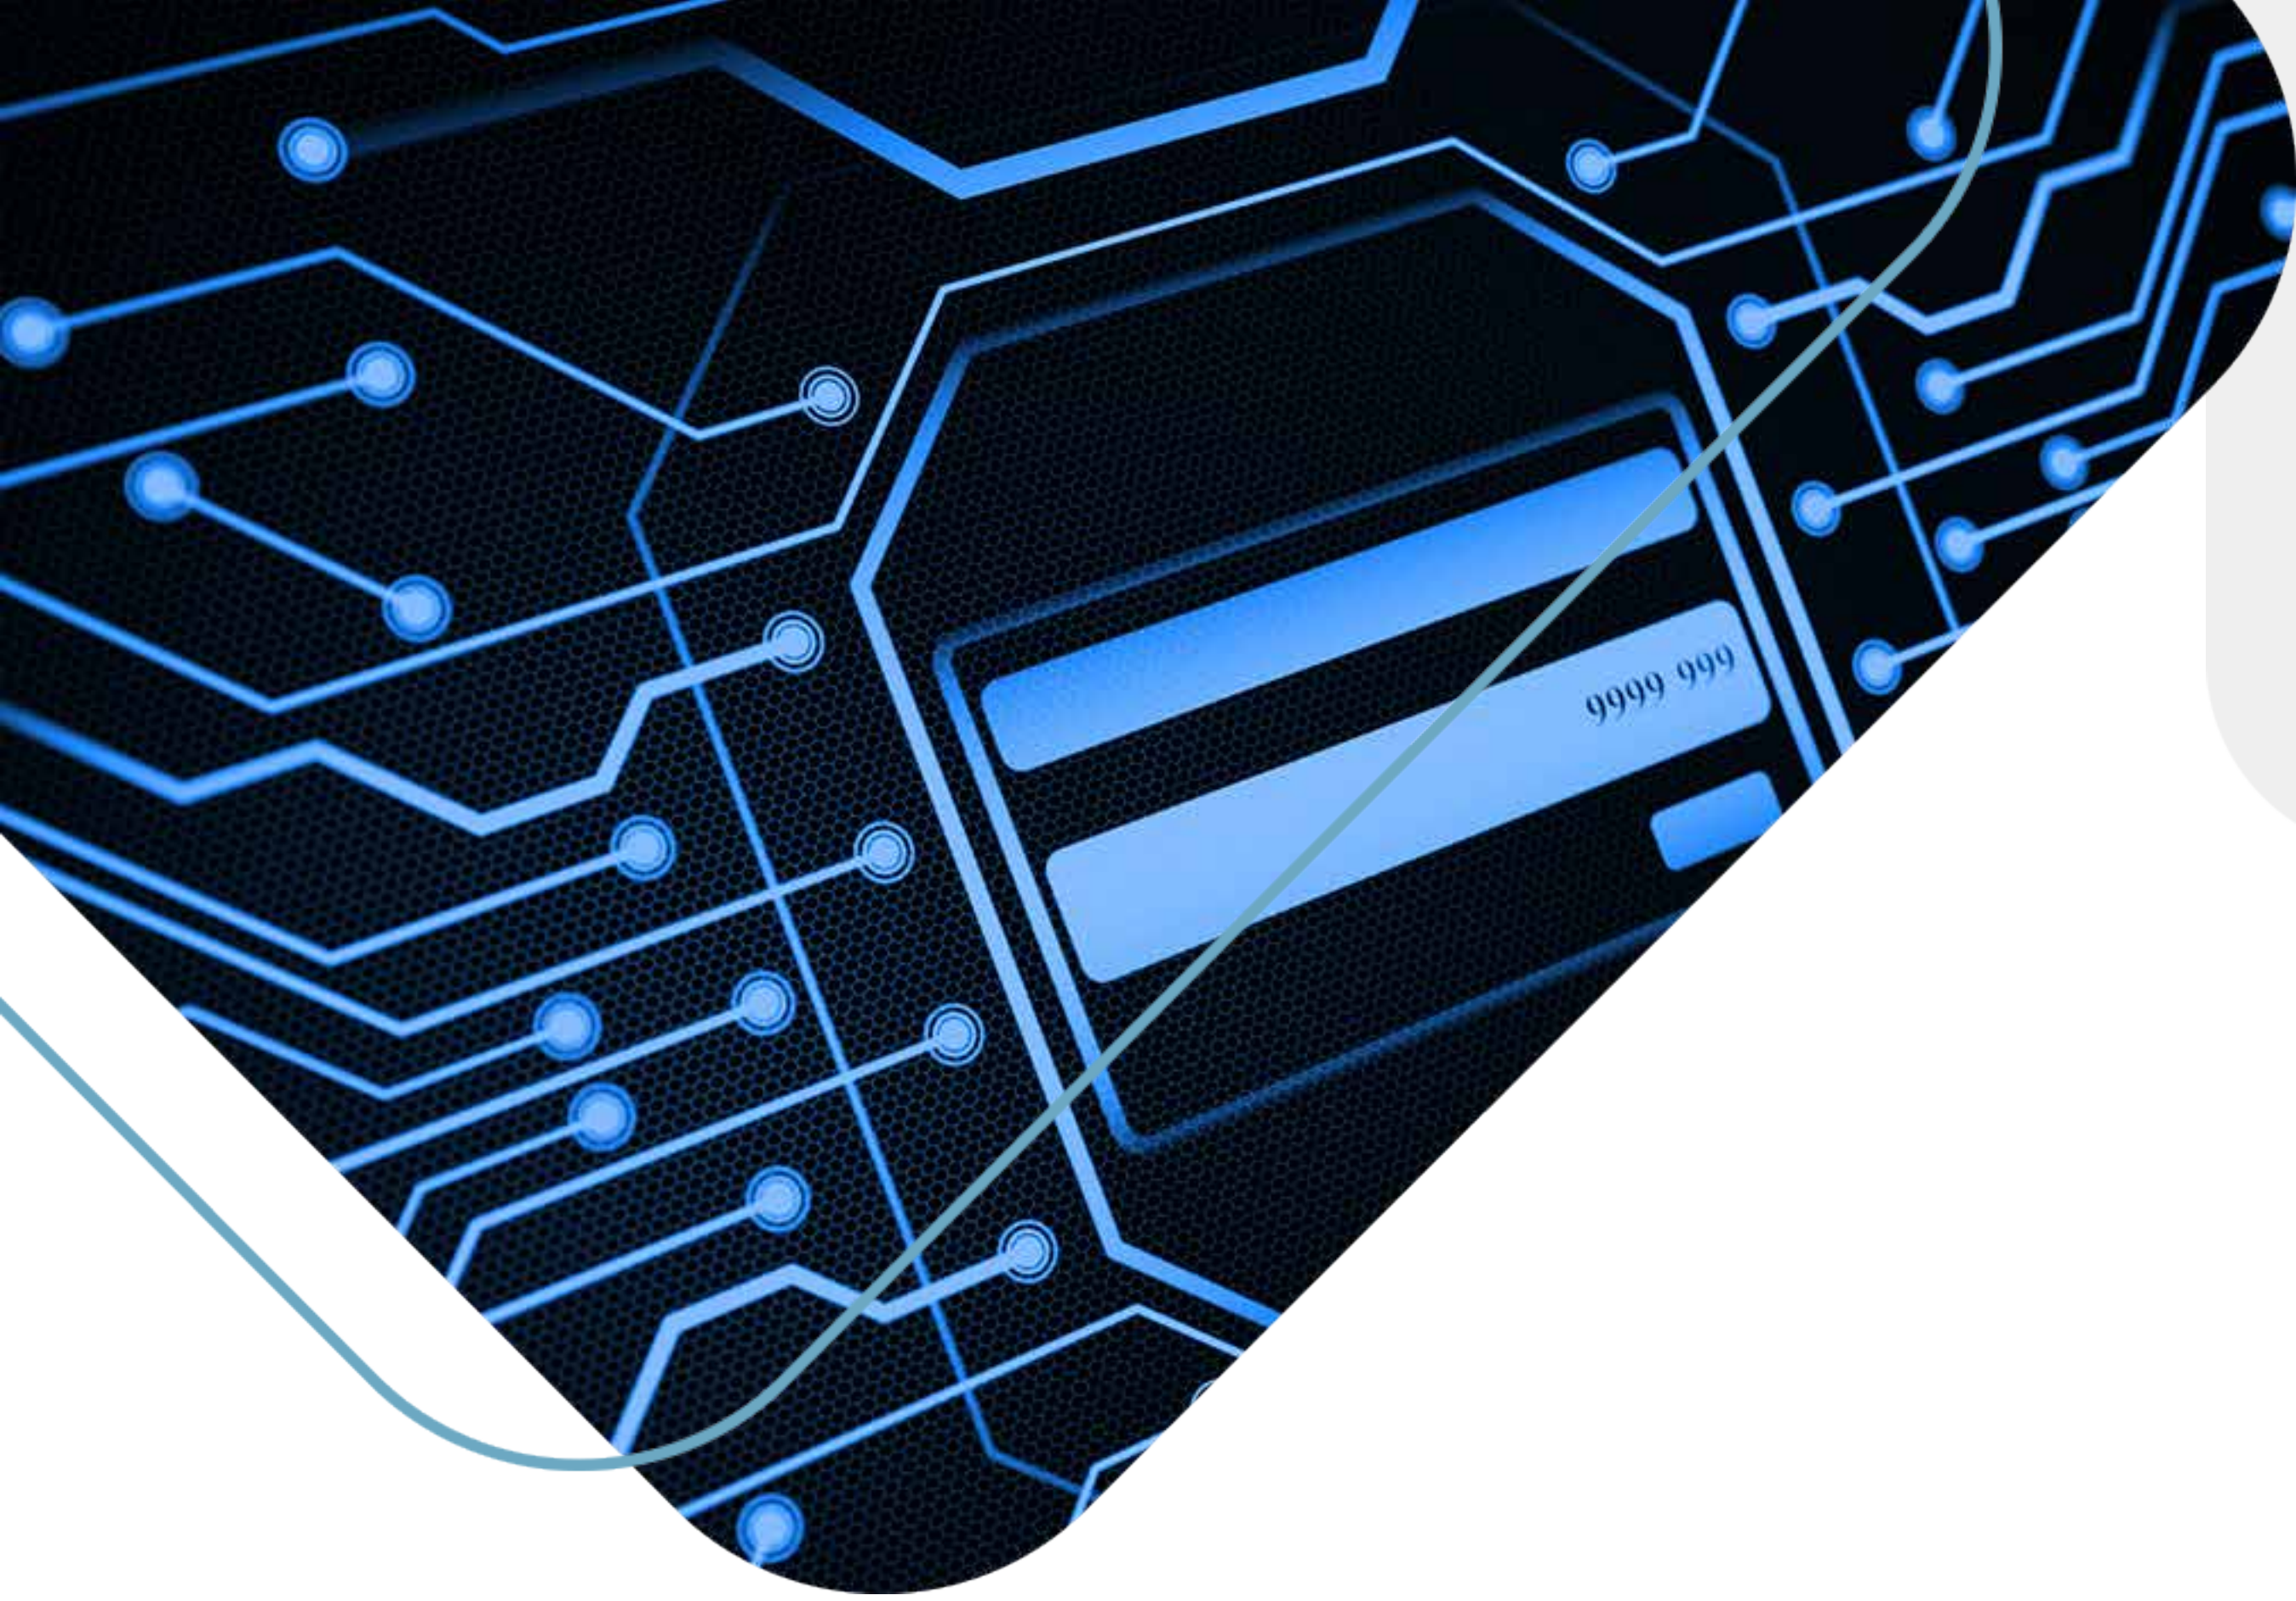

The SAAS is a solution created based on SWIFT's Shared Infrastructure Policy and inspected and certified by SWIFT annually. It enables institutions to access SWIFT systems and their value-added services managed by the highest level of technical expertise, allocating less operational resources. Instead of dealing with SWIFT systems that require special expertise, IT managers and staff will be able to spare more time to other their tasks and it will be sufficient to communicate with a single contact for all their SWIFT-related requests.

Below tasks, in addition to all other required maintenance operations that will be carried out by our experts will no longer be on the agenda of the institutions using the Fineksus Service Bureau SAAS:

- Uploading BIC files,
- Taking archive-backup,
- Patch and MST updates,
- New version updates,
- Database replication

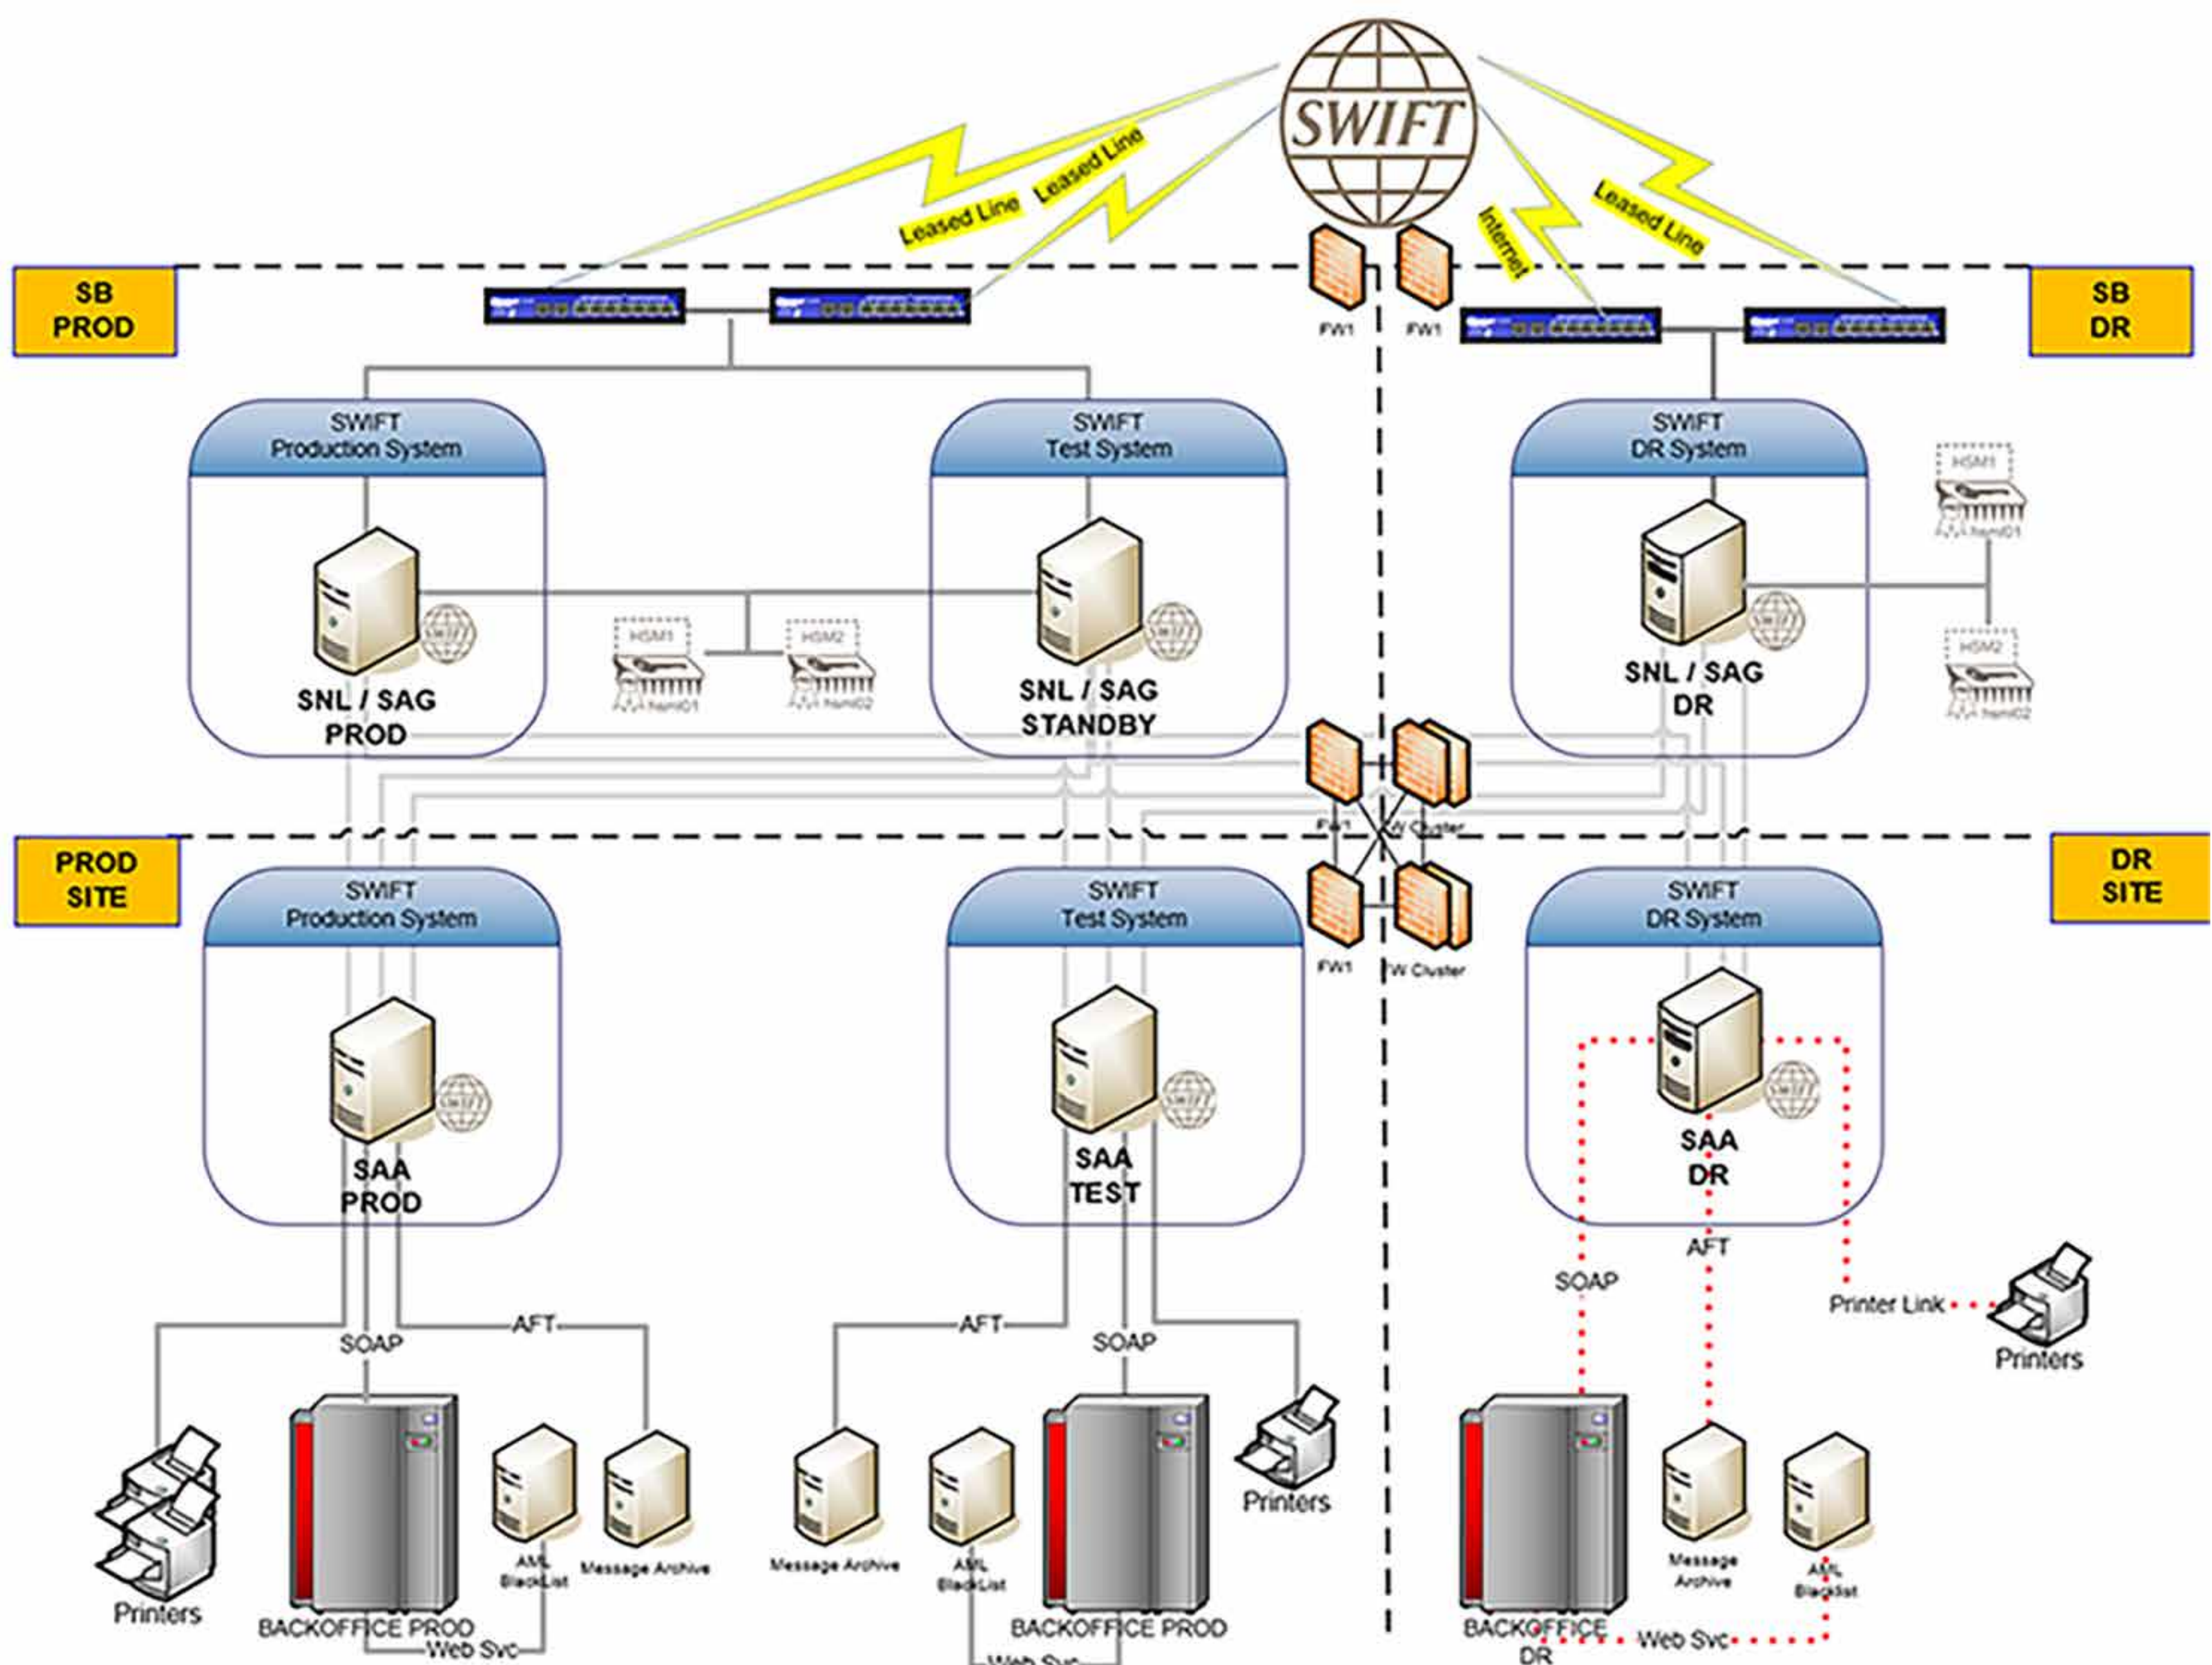

GateWay Connectivity Pack

GWCP

By the GateWay Connectivity Pack, financial institutions can access SWIFT through Fineksus Service Bureau from their primary sites. In this way, all the connectivity components such as Alliance GateWay, SWIFTNet Link, Alliance Connect VPN boxes, hardware security module devices, etc. will be used over the service bureau. Hence these component contracts will be terminated to reduce your costs.

In addition, to minimize the operational costs you will increase the service level by receiving support from our fully SWIFT certified technical consultants.

Primary Connection Package customers will continue to own their Messaging Interface servers (SAA/SAE). So the messaging security will not be a consideration point as it is going to be impossible to view or modify SWIFT messages until they reach their recipients.

PRICING PLAN

Inhouse Connectivity for SWIFT infrastructure can lead to a complex integration process for financial institutions considering 3rd party Vendor Services and additional costs of Connectivity Components.

Fineksus, in partnership with Ritmus, will provide cost-effective and time-saving implementation and execution of all SWIFT systems with fully certified SWIFT engineers and continuous support services.
